**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-25, 28-31, and 46-56, drawn to an optical cover for an image sensor array, classified in class 348, subclass 335.
  - II. Claims 26, 27, and 59-60, drawn to a camera system, classified in class 348, subclass 294.
  - III. Claims 32-45, drawn to housing for an image sensor, classified in class 348, subclass 373.
  - IV. Claims 57 and 58, drawn to a method for controlling Petzval field curvature, classified in class 359, subclass 462.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, II, III, and IV has separate utility such as

Inventions II, III and IV do not require the specifics of the optical system required by Invention I;

Inventions I, III and IV do not require the specifics of the camera system required by Invention II;

Inventions I, II and IV do not require the particular housing that is required by Invention III;

Inventions I, II and III do not require the method for controlling Petzval field curvature as required by Invention IV. See MPEP § 806.05(d).

Art Unit: 2615

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. If the Applicant elects Invention I, the Applicant must select one of the following species:

Species I: Figures 1B and 1C;

Species II: Figures 2A and 2B;

Species III: Figures 3B and 3C;

Species IV: Figures 4A and 4B.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are considered to be generic to all species claimed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if

Art Unit: 2615

the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tia M Harris whose telephone number is 703-305-4807. The examiner can normally be reached on M-F 8:30 am - 6:00 pm.
